

The beginning of a
NEW LIFE

αPOLYGOSAN

Skin • Hair • Nails • Protection of Cells from Oxidative Stress
Reduction of Fatigue • Immune system

α-POLYGOSAN dietary supplement contains **collagen (9000 mg)**, **resveratrol of natural origin** (98% resveratrol in the plant extract of Polygonum Cuspidatum), coenzyme-Q10, vitamins and minerals

αPolygosan:

- Zinc contributes to the maintenance of normal hair, nails and skin.
- Vitamin B2 (riboflavin) contributes to the protection of cells from oxidative stress.
- Selenium contributes to normal functioning of the immune system.
- Biotin contributes to normal energy-yielding metabolism.
- Vitamin B6 contributes to the reduction of fatigue.

COLLAGEN

Hydrolized from Germany

Collagen, a natural protein, is a structural component of the skin, which assures elasticity and hydration by its very high water-binding ability. During the aging process the ability of our bodies to produce collagen decreases, consequently reducing the quantity of collagen in our skin. This, in turn, alters the skin's structure, making it thinner and eventually wrinkled. The loss in self-produced collagen, however, could be compensated by way of our diet.

RESVERATROL

From natural origin

Resveratrol is a type of polyphenol containing naturally derived anti-oxidants.

One of the widely recognized natural sources of resveratrol is the plant *Polygonum Cuspidatum*. This plant represents an acknowledged raw material for the natural extraction of resveratrol and is the type of resveratrol used in a-POLYGOSAN. If we supplement our diet with the appropriate amount of antioxidants, we could have a good chance of helping to mitigate the oxidative effects of these „free radicals“.

COENZYME Q10

Coenzyme-Q10 performs a central role in the energy production of our organism.

It also has a very potent antioxidant feature because in its reduced form it can neutralise the harmful „free radicals.“

Special minerals (Selenium and Zinc) which can increase the antioxidant effect of the product; and several vitamins (B1, B2, B3, B5, B6, B12, Biotin, Folic-acid, Vitamin-C, E and D) which are very important for proper functioning of the human organism.
